## Description :

Prsentation de l'diteurIt's two years post-Zero Day, and former government analyst Jeff Aiken is reaping the rewards for crippling al-Qaida's attack on the computer infrastructure of the Western world. His cybersecurity company is flourishing, and his relationship with Daryl Haugen intensifies when she becomes a part of his team. But the West is under the East's greatest threat yet. The Stuxnet virus that successfully subverted Iran's nuclear defense program for years is being rapidly identified and defeated, and Stuxnet's creators are stressed to develop a successor. As Jeff and Daryl struggle to stay together, they're summoned to disarm the attack of a revolutionary, invisible trojan that alters data without leaving a trace. As the trojan penetrates Western intelligence, the terrifying truth about Iran is revealed, and Jeff and Daryl find themselves running a desperate race against time to reverse it - while the fate of both East and West hangs in the balance. Like Zero Day, Trojan Horse is a thrilling suspense story, a sober warning from one of the world's leading experts

on cyber-security, Microsoft Technical Fellow Mark Russinovich. Trojan Horse demystifies the already common use of international cyber-espionage as a powerful and dangerous weapon, and the lengths to which one man will go to stop it. Revue de presse "To IT folks, Mark is every bit a hero as Wozniak, Gates or Ken Olsen." --Doug Barney, "Redmond Mag" "Russinovich scares us all in this techno thriller that gets the details right!" --"Mikko Hypponen, Chief Research Officer, F-Secure Corporation "Scarily plausible." --"Library Journal" Presentation de l'auteur It's two years post-Zero Day, and former government analyst Jeff Aiken is reaping the rewards for crippling al-Qaida's attack on the computer infrastructure of the Western world. His cyber-security company is flourishing, and his relationship with Daryl Haugen intensifies when she becomes a part of his team. But the West is under the East's greatest threat yet.
